IN THE SPECIFICATION

Please amend the specification at page 9, lines 2-6, as follows:

Fig. 2 is a functional diagram showing the major components of the @SPI (stored procedure interface) command process flow. This command is a part of the MRI (BIS MAPPER Relational Interface) set of commands and combines many of the attributes of the previously existing @FCH (relational aggregate fetch) and @SQL (standard query language) commands. However, it is specifically targeted to executing stored procedures.
